Relevant Skills

- .Net, Node, PHP, JAVA
- Oauth API Integration
- HTML, CSS, JS
- MySql, PostgreSQL
- Linux, Docker, AWS

Education History

HSC

Institution: D.P.Mehta Jr. College, Lonavala

Year of Graduation: 2018

BCA : First Year in YCM open university

Special Skill

- **AWS EC2 Instance:**
 - Deployed and maintained production applications on AWS EC2 instances.
 - Configured and Optimised **EC2** instances for performance and scalability.
- **Reverse Proxy:**
 - Implemented reverse proxy solutions to improve application **security** and **performance**.
 - Designed and managed workflows for reverse proxy configurations.
- **Client Handling:**
 - Successfully collaborated with clients to understand and fulfils their requirements.
 - Demonstrated effective **communication skills** in client meetings and calls.
- **OAuth & SAML Protocol:**
 - Extensive experience with OAuth flows, including authorization code, implicit, client credentials, and refresh token flows.
 - Implemented **Single Sign-On (SSO)** solutions for client applications, enabling seamless authentication across multiple platforms such as WordPress, Shopify, Prestashop, CraftCMS using provider like **Okta, Azure AD, Google, Facebook, Discord**.
- **Selenium Automation Testing:**
 - Developed and executed automated test scripts using Selenium WebDriver reliable testing for **miniOrange Atlassian** product.
- **Tableau:**
 - I have worked on integrating automate report dashboard using **tableau API** for single sign on application.

Projects Detials

Products Ownership

- Successfully managed client projects involving APIs integration in **WordPress** and **Shopify** platforms.
- I had taken ownership for four different application which includes **Social login, Discord Integration, Firewall & IP restriction** and Single Sign On using **OAuth** and **SAML** protocol solutions.
- Developed Plugin form zero solutions for WordPress and Shopify ensuring seamless login using social provider APIs such as **Google, Facebook, LinkedIn & Discord** integration
- Collaborated with **clients** to define project scope, timeline, and deliverables, ensuring clear communication throughout the development process.
- Provided ongoing **support** and **maintenance** services, addressing client inquiries and resolving any issues promptly.
- I have knowledge of **Active Presenter** (Video creator) for showcasing product features, tutorials, and promotional content.
- I have work on plugins on creating **documentation**, set up guidelines and landing pages.
- Worked on various integration such as **Mailchimp, Klaviyo, HubSpot, Sendinblue** for email marketing and syncing information on SSO.
- I have work on integrating **Firebase** OTP login functionality using authentication and verify API
- I have implemented feature in firewall application to redirection and restriction of user based on there **geo location** and **google bot user agent** present in request
- Develop an integration part for discord application where will able to get add in server as a **member** and get **role** assign based on there **products** purchase on shopify store.

Self Learning

Self-Study Networking and Hardware

- **Networking:**

- I help one of my client to set up there network where they want one server machine with static IP and large bandwidth of internet
- I have knowledge about TCP/IP, DNS, DHCP, VLANs, Routing, Switching, Firewalls, VPN, Subnet

- **Hardware:**

- Built and upgraded custom desktop computers, optimising performance and resolving hardware issues.
- Developed expertise in troubleshooting and resolving hardware-related issues.

- **Docker:**

- Implemented Docker-based infrastructure using Ubuntu to streamline application deployment processes.
- Configured and managed Docker containers to host WordPress and PrestaShop applications.

- **Operating System:**

- Acquired comprehensive knowledge and hands-on experience in various operating systems, focusing on Ubuntu, Linux Mint, Parrot, and Arch Linux.
- Successfully installed and configured these operating systems on my own office laptop for daily use.
